

Hosted Exchange Email – Quick facts

If you're looking for a secure, mobile email system for your business, our hosted Microsoft Exchange™ email plans present the perfect solution. MS Exchange™ lets organisations reap the benefits of using Exchange accounts in conjunction with Microsoft Outlook **without having to invest in the costly infrastructure themselves.**

Hosted Exchange Email is stored on managed servers giving you access to your email, calendar, contacts and shared files by a variety of means, including Outlook™, Outlook Mobile Access (OMA) and Outlook Web Access (OWA), which are all provided for free. The fact that the Exchange is hosted means your data is backed up daily.

Hosted Exchange allows you to set up almost immediately with no investment in hardware software. Add users as you need to.

Many people use their email folders as file and data repositories; they also use it track conversations with clients, suppliers and colleagues. The advanced search features of Outlook are ideal for this purpose.

What is hosted Exchange?

Microsoft Exchange is the world's foremost business email system, enabling communication and collaboration for many of the biggest global organisations. Microsoft Exchange 2007 enhances company productivity through numerous advanced features:

- > Real-time-synchronised email, files, calendars and contacts through Microsoft Outlook client
- > Mobile access on handheld devices through Microsoft Mobile client
- > Advanced web mail through Outlook Web Access
- > Shared calendars that let employees see colleague availability to schedule meetings, book conference rooms and plan projects
- > Shared task lists that allow 'to do' lists to be created and assigned, then shared with team members
- > Synchronised contacts which guarantee your personal address book will never be lost or misplaced, either on your PC or mobile phone

- > Optional BlackBerry/Active-Sync
- > Powerful Control Panel
- > 99.99% Uptime Guarantee

Detailed features of hosted Exchange

Most people use their outlook folders as a file repository, and a record of emails sent and received. The advanced search facility in outlook enables easy search and retrieval of emails and documents. So it's no wonder that outlook folders grow over time.

Our Exchange email includes three options for storage culminating in unlimited storage, enabling you to save more of your critical business correspondence.

Full licensed copy of Microsoft Office Outlook 2007 or Entourage 2008

Our hosted Exchange service includes a free copy of Outlook 2007 or Entourage 2008 for all mailbox users in your company. This is a major advantage for hosting versus in-house Exchange 2007, which no longer includes Outlook 2007.

Fully functional mailbox available through Outlook Web Access (OWA)

Outlook Web Access 2007 allows you to connect on the move and have full access to your mailbox, calendar and more from any browser.

Support For BlackBerry, Windows Mobile ActiveSync

Get your work done anytime, anywhere. Synchronise your email messages, schedules, contact information and task lists with your Windows Mobile device or BlackBerry.
